Experience

Oracle – Hyderabad, India

June 2024 – Present

Application Solution Developer | Java, Spring Boot, Elasticsearch, Python, GenAI

- Improved contract and deal search performance by **5–10x** by implementing Elasticsearch in OCIP, enabling high-speed full-text search and faster data retrieval.
- Designed complex filtered queries using order number, flags, and Boolean logic, developed Spring Boot microservices for reporting, filtered export, and REST-based UI integration
- Automated Oracle DB to Elasticsearch data synchronization through Kafka enabling timely indexing.
- Implemented dynamic Oracle JET components, pagination to support business search requirements, allowing users to navigate large result sets efficiently, retrieve correct records faster, and increase productivity.
- Developed a Vector Search engine for clause prediction, significantly accelerating legal document drafting and reducing deal velocity by **80%**, from 1–2 weeks to **1–2 days**.
- Built agentic workflows to support clause insertion in redline documents based on customer requirements.
- Developed a GenAI-based key term extractor to replace rule-based methods, achieving **36%** improved accuracy.
- Implemented MLOps pipelines for continuous training, deployment, monitoring, and model refresh, accelerating AI feature delivery and improving deal velocity through faster, more reliable contract intelligence updates
- Secured internal components via service gateways, proxies, and config isolation. Managed Helm-based deployments in Kubernetes for modular service rollout.

Meta XP Private Limited – Remote

Oct 2022 – Nov 2022

Data Science Intern | Speech Recognition, Data Analysis, AI

- Built an ML pipeline to transcribe video audio using Google Speech-to-Text and analyzed speaking patterns such as filler word frequency, pitch range, and speech rate for public speaking evaluation.

Indian Institute of Science (IISc) Bangalore | Research Intern

Jul 2022 – Aug 2022

- Performed molecular dynamics simulations using LAMMPS to study Lennard-Jones fluids and determine vapor-liquid coexistence and equilibrium properties such as pressure and density.

Skills

Backend Development: Java, Spring Boot, Python, Microservices, REST APIs

AI / GenAI / ML: Generative AI, LangChain, Vector Search, RAG, PyTorch, TensorFlow, MLOp, MCP, Agentic workflow.

Frontend Development: Oracle JET, TypeScript, JavaScript, HTML, CSS

Data & Cloud: Elasticsearch, Kafka, Oracle SQL, OCI Streaming, Kubernetes, Docker, Git, Fusion Agent Studio

Core Strengths: Problem solving, rapid adaptability, result-driven execution, team collaboration, technical design

Education

National Institute of Technology Calicut (NIT Calicut) | B.Tech, Chemical Engineering | CGPA: **9.2** | May 2024

Projects

Image Captioning (2022): Developed a deep learning model to generate accurate captions for images using ResNet for visual feature extraction and a Transformer decoder for text generation.

Certifications

[Deep Learning Specialization](#) (Coursera), Andrew Ng | [Oracle Data Science](#) | [Oracle Vector Search](#) | [Agent Studio](#)

Honors and Awards

- **Gold Medalist** – Final Year Branch Topper: Awarded for securing the highest CGPA in B.Tech.
- **Rockstar Gold Award**, Oracle: Received the highest-tier organizational award for exceptional performance and significant contributions to OCIP enhancement (Q1 2025).

Interests : Chess, Cricket, Cooking, Travelling, Stock Analysis
